About My Topic

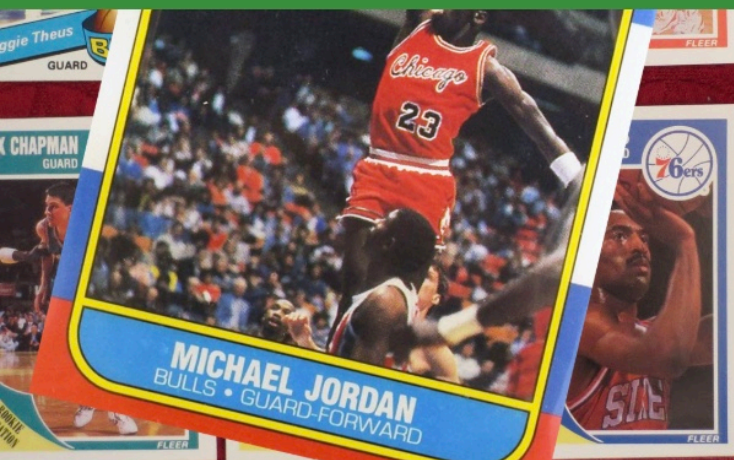

www.youtube.com refused to connect.

Basketball cards have long been cherished collectibles, blending sports culture with art and storytelling. Initially popularized in the mid-20th century, they gained mainstream appeal, connecting fans with their favorite players and moments. However, the hobby has faced challenges, such as market manipulation, counterfeit cards, and rising costs, which have made it less accessible to younger collectors. Despite these issues, basketball cards continue to play a vital role in fostering community, nostalgia, and passion for the game.

Impact

Vintage Cards

Vintage basketball cards capture the rich history and iconic moments of the sport, connecting fans across generations.

Card Trading Events

Card Trading events bring collectors together to exchange, showcase, and celebrate their basketball card collections, fostering a sense of community and nostalgia.

News

The Evolution of Basketball Cards

This article explores the history and cultural significance of basketball cards, highlighting key milestones in their popularity.

Market Trends: The Rise and Fall of Card Values

This article analyzes the fluctuating value of basketball cards and how market trends are affecting collectors.

WEB101 Milestone #2

 Student Name: Keith Wood

 Email: keithwood2024@fau.edu

 VS Code for EDU Project link: <https://vscodeedu.com/s9ilyS4RxH0OH5jiSaKK>

Questions & Shoutouts (Required)

 Check off each of the features you have completed. **You will only be graded on the features you check off.**

 **Question #1:** What are some differences between flexbox and the box model approach to layout that you used last week? What did you like about flexbox? What was challenging?

Flexbox and the box model differ in layout approach. The box model is more static, relying on fixed padding, margins, and borders, while Flexbox offers dynamic, flexible layouts. I liked Flexbox for its ability to easily adjust layouts with screen size changes, which was more challenging with the box model. The most difficult part was understanding properties like align-items and justify-content, but once I got used to them, Flexbox made layout management easier.

 **Question #2:** Why might we want to have a navigation bar on our webpage? What is still confusing about how we built this feature?

A navigation bar is important for easy site navigation and improving user experience. Without it, users might struggle to find content. Building the navbar was mostly straightforward, but I found it a bit confusing to make sure it stays fixed at the top without blocking content, especially across different screen sizes.

 **Shoutouts:** Share appreciation for anyone who helped you out with this project or made your day a little better!

I want to shout out professor Resnick for teaching complex concepts well and the TA for doing a great job grading everything pretty fast.

Describe the elements you styled using the stylesheet. (Required)

EXAMPLE: *Styled element #0: body background is light blue*

- Styled element #1: Body background is set to white with a serif font (Georgia)
- Styled element #2: Navbar is fixed at the top, with green background and white text.
- Styled element #3: Header items use Flexbox to organize the image, title, and buttons horizontally.
- Styled element #4: Footer is fixed at the bottom with a dark blue background and white text.
- Styled element #5: Buttons are styled with a blue background and white text, and change color on hover.
- Styled element #6: Links in the navbar change color on hover and active states.

Write below which class you refactored to use flexbox. (Stretch)

EXAMPLE: Flexbox class: `.newsitems`

- Flexbox class: `.head-container`

Submission Checklist

Required features (30 pts.)

- ☒ ~~Provided link correctly links to the shared VS Code for EDU project~~
- ☒ ~~Link correctly links to my public project (1 point)~~
- ☒ ~~Question #1 answered above (1 point)~~
- ☒ ~~Question #2 answered above (1 point)~~

Your Project Website should include the following:

- ☒ ~~Two or more buttons (2 points)~~
- ☒ ~~Two or more images (2 points)~~
- ☒ ~~At least six elements have been styled using the stylesheet (2 points each for up to 12 points total)~~
- ☐ Your website has a responsive header that uses flexbox (5 points)
- ☐ Navbar links to at least two locations on your page
 - ☐ Link #1 works (3 points)
 - ☐ Link #2 works (3 points)

Stretch Features (5 pts.)

- ☒ ~~An embedded video from a credible resource about your topic (1 bonus point)~~

- ☒ Links to resources on your topic in main body of website (not in footer) (1 bonus point)
- ☒ A link to a picture/icon in the head tag on your website so that the tab your website is on is recognizable. You may need to pop out the website view to its own tab. (1 bonus point)
- ☒ A fixed footer to your page that includes external links to related sites (1 bonus point)
- ☒ Refactor any other classes to use flexbox. (1 bonus point)

 **Tip: You can see specific grading information, including points breakdown, by going to the [Grading Rubrics page](#) on the course portal.**

Submit your work!

Step 1: **Click** the Share button at the top of your screen double check that anyone with the link can edit.

General access

Step 2: **Copy** the link to this document.

Step 3: **Submit** the link on the portal.
